RE: Pilot Study Technical Memorandum at Operable Unit 7, Site 16, Naval Air Station
Cecil Field, Jacksonville, Florida.

Dear Mr. Sanford:

I have completed my review of the Pilot Study Technical Memorandum at Operable Unit 7, Site 16, Naval Air Station Cecil Field, dated January 2010 (received February 3, 2010), prepared and submitted by Tetra Tech NUS, Inc. The Technical Memorandum adequately describes the activities and results of the in-situ bioremediation and in-situ chemical oxidation (ISCO) pilot studies, which were conducted to determine the feasibility and effectiveness of those technologies in addressing contaminated groundwater present at Site 16. The report is well written and is acceptable as final.

If you have any concerns regarding this letter, please contact me at (850) 245-8997.

Sincerely,

David P. Grabka, P.G.
